SKILLS SUMMARY

Javascript

⚛ React.js

🟩 Node.js

🔻 Ruby

Rails

HTML

CSS/SASS

MySQL

🐘 PostgresSQL

🍃 MongoDB

Github

PERSONAL PROFILE

I'm a full-Stack Developer in love with technology who enjoys solving problems using software. I have two years of experience leading and working with teams to develop software for the construction sector, and in this period I founded my own startup (Construtec). Before I worked as a project manager in the construction sector, I worked for the Peruvian government building tracks, schools, and hospitals. I enjoy reading books about technology companies and everything related to entrepreneurship. I look forward to applying my leadership skills to help solve global problems in the technology industry.

WORK EXPERIENCE

Front-end Developer.
Regional Management of Housing, Construction and Sanitation | August 2020 - December 2020

- Designed and implemented a web application with React to give training to personnel on a regional level.
- Led the engineering team to develop web application (http://lacasadelatm.com)

CEO - Software Developer.
Construtec Perú | July 2019 - July 2020

- Developed the website (www.constructecperu.com).
- Designed an executive business model to fill a market need, and then marketed and released the product.
- Led three engineers through the process of developing the software CPIP (Control of Public Investment Project).
- Gave training to new users who bought the software.

Product owner.
